

Anastasiia Sira

SENIOR UX/PRODUCT DESIGNER

STATEMENT

Senior Product Designer with 6+ years in UX, designing complex, workflow-heavy products across web and mobile. I find high-impact usability problems through research and turn them into clear, consistent, polished experiences.
I own the full design process, from problem framing to high-fidelity UI and quality through implementation, with strong attention to detail in visual and interaction design. I use AI tools (ChatGPT, Claude) in my daily work.
Domains: SaaS, GovTech, E-commerce, FinTech, Marketplace.

WORK EXPERIENCE

EPAM Systems

NOV’20 – PRESENT

UX Designer

Worked on complex products across domains, where I:

- Designed end-to-end as the sole designer on multiple products, from problem framing and research to high-fidelity UI and handoff
- Legal SaaS: fixed long-standing usability issues across key user journeys, cutting steps to improve retention; shipped in 3.5 months
- GovTech portal: created the visual strategy and Design System, designed sign-up and post-login flows from scratch
- E-commerce: planned and ran 5 interviews and 7 usability tests on a ticket purchase flow, turning insights into a mobile-first redesign
- Built scalable Design System patterns with engineering: components with full states (hover, disabled, error, empty, loading) and variants
- Crafted pixel-perfect UI and interactive prototypes with animated transitions
- Owned quality through implementation: Visual QA and accessibility checks (WCAG 2.2, keyboard navigation) with developers and QAs
- Presented and justified design decisions to stakeholders and product teams, aligning solutions with business goals

Getmancar

SEP’20 – NOV’20

Freelance UX Designer

Ran user interviews and usability testing of a car-sharing iOS app and designed UX improvements based on the findings.

Deep Consulting Solutions

NOV’19 – FEB’20

UX Architect, UI Designer

Created UX architecture of CRM systems, business analysis, UX/UI design for custom apps.

Freelancer

JUL’17 – JUL’19

Graphic Designer

Created print design for clients: posters, menus, covers, banners, vector illustrations etc.
